

## IS PIONEERING YOUR LOVE?

*Pioneers are likened to the thoroughbred horse. Because it is built in him and he loves to race. And a pioneer who has it in his heart loves pioneering. Sad to say, a race horse may get injured and for its own good, is pulled out of the race. But, because the horse loves racing, it will race inside the circle with the other horses, even though it's injured, and they will race and even harm themselves because they love to race. It's not the fault of the horse that it loves to race. It's who he is. And for that reason, the caretaker will take the injured race horse and put him out to pasture so that he doesn't injure himself any further.*

*Pioneers are like that sometimes. Because of their love of pioneering, they keep going, sometimes even to the point of injuring themselves further. Some times it is necessary to take that injured pioneer off the list for a time to heal and recover, and rest. But, even though the horse is not racing, it does not mean that he's not a thoroughbred race horse. It is the same with some who have pioneered and have had to come off the list for a while to heal. Even though you are not pioneering, that does not mean you are not a pioneer. Why? Because of the love you have for it. It's who you are.*
